A full program is available at www.iohc2015.com

ABSTRACT SUBMISSION

IOHC2015 invites submission of abstracts. The abstract submission will open from August 1, 2014. The deadline for abstract submission is October 1, 2014.

SCIENTIFIC **FOCUS**

Prevention at the source is key in controlling (infectious) diseases that have a growing impact on humans, animals and their ecosystems. The 3rd International One Health Congress will therefore focus on how science can help in preventing emerging and re-emerging (infectious) diseases. Through a special Science Policy Interface policy makers and international organizations may translate the latest scientific advancements into preventive measures.
